

Craig Jack

Quality Designer | Production Operations | Organizational Development
Los Angeles, CA (412) 352-0643 craigjack33@gmail.com [[LinkedIn Profile](#)]

Professional Experience:

Santa Monica Studios | Playa del Rey, CA

Senior QA Tester

Oct 2025 - Present

- **QA Planning Lead & Cross Functional Operations** – Own planning and coordination for the QADS (dept specialist) team supporting God of War: Laufey, partnering with Production, Design, Engineering, and QA leadership to coordinate embedded testing strategy, execution priorities, and release readiness.
- **Team Operations & Communication** – Established the QADS organization's first recurring planning and alignment cadence, creating structured knowledge sharing, mentorship, issue escalation, and cross-team communication practices.
- **Operational Framework Development** – Designed scalable operational frameworks for embedded QA, including scheduling models, onboarding systems, communication structures, and testing workflows that improved execution consistency across multiple disciplines.
- **Milestone Planning & Quality Gates** – Designed QA milestone evaluation frameworks and quality gate recommendations that established measurable quality criteria independent of production milestones, improving long-term planning and release readiness.
- **Production & QA Operations** – QA point-of-contact during Director-level triage discussions, coordinating cross-discipline testing priorities across Environment Art, Level Design, Systems Design, and Production teams.

Respawn Entertainment | Chatsworth, CA

Quality Designer - Apex Legends

Sept 2020 - June 2025

- **User Experience Insights & Cross-Functional Alignment** – Led cross-org collaboration (UXR, Community, Live QA, Security, Customer Support) to identify

user friction points and deliver unified, data-informed insights to director-level leadership across 15+ seasons.

- **Playtest Operations & Workflow Ownership** – Owned internal playtest roadmap and intake processes, partnering with Production, Design, and UXR to prioritize testing initiatives and improve end-to-end feedback pipelines.
- **UXR Program Leadership & Impact Analysis** – Directed large-scale UXR events (200+ participants), translating qualitative and quantitative feedback into actionable insights, improving engagement by 200% and build stability by 25% over 10 seasons.
- **Scalable Program Development** – Co-founded and scaled an 80+ member playtest program, expanding globally and establishing repeatable frameworks for user feedback collection, workflow design, and support readiness.
- **User Advocacy & Data Storytelling** – Acted as QA and Player Experience advocate, presenting insights at global conferences and synthesizing user sentiment into strategic narratives for leadership decision-making.

SnapChat | Santa Monica, CA

Quality Assurance Engineer

Aug 2017 - June 2020

- **Product Quality & User Experience Ownership** – Led QA strategy for Sponsored Creative Tools, supporting global feature launches and ensuring high-quality user experiences across millions of users.
- **Automation & Data-Driven Efficiency** – Developed mobile automation frameworks (Java), reducing manual testing by 40% and improving feature stability by 30%, enabling faster iteration cycles.
- **Feature Launch & Cross-Team Coordination** – Partnered with product and engineering teams to launch 12+ features, including in-app commerce, ensuring readiness, adoption, and performance tracking.
- **Release Readiness & Risk Assessment** – Owned build sign-off processes, evaluating feature quality, usability, and release risk across multiple teams under tight deadlines.

Callfire | Santa Monica, CA

Production Designer

Jun 2017 - July 2017

- **Graphic Design** - Created graphic designs for emails, case studies, and banner ads to be used on multiple company websites. This consisted of prototyping multiple designs and color schemes to be used in daily/weekly updates.
- **QA Web Testing** - Developed and Lead all testing efforts of the new web pages for functionality across all supported formats. Prior development had no quality control for site redesign or updates. Testing included web, ipad, and mobile formats and ensuring a consistency in layout between the different sizes.
- **Video Design** - Prototyped animated video gifs for future ad banners using Adobe Premier and After Effects. This was previously outsourced work which I was able to bring in-house to show 2 types of animated design.

Amazon Games Studio | Irvine, CA

Quality Assurance Lead (Levels Specialist)

Nov 2016 - May 2017

- **Level Feature Owner** - QA Lead for the Levels team providing test planning and playtesting for the unreleased PC title Breakaway.
- **Outsource Coordination** - Led coordination with on-site and outsourced teams by providing 20% accelerated feedback for level design reworks.
- **Training/ Onboarding** - Provided training to junior QV members for internal lead role promotion.
- **Beta Testing** - Performed internal functionality Alpha testing on additional Amazon titles Crucible & New World.
- **Coordinator** - Provided direction for onsite Coca-Cola Game-a-thon with about 12 Twitch community members.

Inhance Digital | Los Angeles, CA

Quality Assurance Lead

June 2015 - Oct 2016

- **QA Manager** - Lead for the largest project to date for the company, 17 applications delivered in 4 months with onsite installation. Responsible for people management, project scheduling, and onsite launch supervisor.
- **QA Lead** - Oversaw testing for 20+ projects, creating test plans, proposals, and optimizing localization efforts, reducing testing time by over 50%. ([L3Harris](#))
- **AR/VR Testing** - Managed testing planning on AR / VR, Mobile, and interactive touch screen application used for trade show exhibits. ([AboveandBeyond](#))

JibJab | Venice, CA

QA Jr. Engineer/Technical Artist

May 2012 - Feb 2014

- **Technical Artist** - Produced animations, compositing, and finalized renderings used for various high-profile platforms, including national broadcasts and award shows. ([Storybots](#))
 - Using adobe creative suite, (Premier, After Effects, & Photoshop) rendered and composited final videos for variable uses.
- **Parental QA** - Co-led the QA launch of the kids' website Storybots.com, ensuring safety and functionality for young users.
- **Video Editing** - Created final rendering and video edits for all Jibjab & Storybot videos posted internally and on Youtube.
